

EMS Mounting Kit Specification

General

- * EMS standard mounting kit is 300 series SS
- * All kits are designed by trained designers and approved by a licensed engineer
- * AutoCAD drawings are generated for each part
- * All manufactured parts are 100% inspected
- * All parts are marked with a part number for easy reorder
- * All kits are packaged with fasteners and/or accessories and labeled with customer's PO# and EMS kit number.

Bracket Specification

- * 304SS is our standard, but any material may be quoted
- * EMS does not use SS tubing
- * Brackets are made from SS plate by shearing or by waterjet
- * EMS bends the final bracket to height tolerances of +/-0.030".
- * All brackets are deburred and time saved for a uniform and attractive appearance

Coupling Specification

- * Couplings are cut from 303SS round bar, but any material may be quoted
- * Couplings will not interfere with valve packing
- * Couplings are made on CNC machining centers
- * Couplings are pocket milled for highest strength and quality
